

Instructor Information

Professor: Symancyk

Course: Math 191 Section 001 Fall 2023

Email: dfsymancyk@aacc.edu (It is best to send messages via Canva)

Phone: 410-544-1516

Office Hours:

Monday 10:00 am – 10:50 am in the Math Building Room 231

Wednesday 11:00 am – 12:50 pm via the zoom link to be added here

Course Dates

Monday and Wednesday 8:00 – 9:45 am starting August 28, 2023 in CALT 201.

Course Format

This is an in-person class which will have online assignments.

Completing this course will take you at least **12 hours per week**. A traditional 4-credit lecture course in this 15-week session meets for 4 hours per week, and in a traditional class, it is expected that you will spend 2 hours outside of class studying and completing assignments for every hour spent in class. This amounts to 12 hours per week.

You may require more than 12 hours per week, but you should not expect it will take less. You will spend this time attending class, watching videos, taking notes, completing homework, studying, asking questions, doing online homework, and taking proctored exams.

Course Description

Learn to find limits, derivatives and integrals of functions. Apply these concepts to explicit, implicit, algebraic, trigonometric, and transcendental functions, using derivatives to analyze graphs and to model real situations.

Prerequisites

Prerequisite(s): MAT 151 or MAT 146 or equivalent, or completion of three years of high school mathematics including trigonometry and achieving an appropriate score on the mathematics part of the ACT or SAT or the Mathematics Placement Test.

Note: Credit is not given for both MAT 191 and MAT 122 or MAT 191 and MAT 230.

Learning Outcomes

A student completing this course successfully will be able to:

- a. Find the limits of functions algebraically, numerically, and/or graphically, and interpret these limits.
- b. Perform differentiation on functions, including transcendental functions, algebraically, numerically, and graphically.

Course Syllabus: MAT 191: Calculus 1

- c. Analyze graphs and behaviors of functions with regard to rate of change and concavity.
- d. Model problems from the sciences that involve rates of change.
- e. Find indefinite and definite integrals of functions, including some transcendental functions

MAT191 Learning Path

In order to successfully complete the course, we have laid out a plan for you to learn and work through the materials using the Modules link in Canvas. The Modules are divided into a Getting Started Module and four other modules corresponding the 4 units of the course. Modules 1 through 3 correspond to the material on Tests 1 through 3.

Section Pages and Note-taking

Each Unit is divided into section pages. These pages include Lecture Material and links to the WebAssign homework for the section. The Lecture Material will include one or more note packets (skeleton of the lecture), completed note packs, and in some sections one or more videos on the material in the note packets. There is also a study guide at the start of each section which provides tips and alerts you about important topics.

Writing things out as you take notes in class or on the videos is, as you know, an important step in the learning process. Jot down any questions to raise in office hours or in an email.

Some of these pages will also include animations that I've created with Maple that I use in my in-person classes to try to illustrate things that are difficult to draw or are computationally intensive.

WebAssign Homework

After you've taken notes on a given section, start your WebAssign assignment. If you are having difficulty on a particular problem, bring that question to me either before or after class, in office hours or via an email. While doing the WebAssign homework it is important for you to write down what you are doing. This gives you something to review when you prepare for an assessment and also gives you something to share with me when you have a question.

Quizzes

There are five quizzes in the course.

Required Materials and Services

Computer and Internet Access

This section of MAT 191 requires extensive computer use. In order to successfully complete the course, you must be able to have regular access to stable internet for the homework and quizzes and a computer with a webcam and microphone to use virtual office hours.

Please contact your advisor for more information on using Financial Aid.

For more information about resources for online learning, visit the VC (Virtual Campus) Orientation site via the link found on the main navigation menu in the course.

Course Syllabus: MAT 191: Calculus 1

WebAssign Access Code

A WebAssign **access code is required**. When you purchase a WebAssign access code for the text, you will gain access to the e-textbook, textbook video lessons, homework, and other assessments. For more information about how to purchase the access code and register in WebAssign, see the Getting Started section of the Modules in Canvas. Note that there is no class key for this course as WebAssign and Canvas are synced

IMPORTANT: I strongly recommend that you select the free trial starting on the first day of class. WebAssign automatically counts the number of days for the free trial starting from the first day of class and not from when you select it. The free trial allows you to decide whether the course is the right one for you before paying for the access code.

Textbook

Calculus: Early Transcendentals, 9th edition by James Stewart published by Brooks/Cole.. (Available as an e-textbook or as a hard copy. Buying a hard copy of the book is not required but is your option) ***If you will be taking 192 or 201 after this class, purchase a multi-semester WebAssign access code for the book.***

Calculator

Your work in this course will require the use of a TI-83+ or TI-84+ calculator. When you are taking a test or an exam, you may not use any calculator that uses a Computer Algebra System. (For example, you may not use a TI-89, TI-92, or TI-Nspire.) Cell phones, tablets, laptops, and watches may not be used as a calculator on exams.

Lecture Notes

Reading a math textbook is very different than reading a novel— in order to successfully follow a math textbook or video, you must read with a pencil and paper at hand. With that in mind, we have provided you with note packets for topics in the course to use while attending class or looking at videos. It is also recommended that you take notes while reading the e-text, watching the videos that are included with it and as you do the homework in WebAssign. This will help you prepare for the quizzes and tests and give you something to share with me when you have questions about a problem.

Graded Assignments and Learning Activities

WebAssign Homework

You will have Graded Homework Assignments for each section that are in WebAssign. Don't delay getting started on them. Each assignment has due date. If you do not finish an assignment by the due date, you can get up to three automatic two-day extensions with a 15% penalty on work completed after the due date. Any late work must be completed in a 14-day window from the original due date.

Even though you will only turn in final answers on this work, you should work out homework problems completely on your own paper. Writing complete, well-organized, and legible solutions will help you to prepare for quizzes, tests, and the final exam.

Please explore the e-text and other features of WebAssign, such as the videos for extra support and practice.

Course Syllabus: MAT 191: Calculus 1

Quizzes

There is a quiz on material preliminary to the course that is due at the end of the first week. In addition, there will be quizzes on each of the four major modules in the course.

Unless directed otherwise, allowed resources for quizzes are your TI-83/84 + calculator, your notes, and the textbook. All other materials (apps, internet, tutors, persons, etc.) are not allowed and considered a violation of the Academic Integrity Policy.

Note 1: Quizzes which involve written work must be submitted to Canvas as a single PDF file. Directions on how to do this are given in the Getting Started unit of the Modules.

Note 2: Late quizzes will not be accepted and there are no makeup quizzes. Graded quizzes will be returned to your Gradebook usually by 72 hours.

Note 3: Your lowest of the 5 quiz scores will be dropped.

Give yourself PLENTY of time to study ahead so that you are able to come to my office hours (which is completely normal and okay!) before you take a quiz or exam.

Proctored Assessments

There will be three tests and a final exam in this class that you will take in our normal classroom. You will not be allowed to use notes, books, or online help resources. You will also not be allowed to access web pages or use your cell phone as a calculator, smart watch, or any other personal electronic device. Using or handling your personal electronic devices during the test will be considered a violation of the Academic Integrity policy. You may use your TI-83 or TI-84.

Tests

If you know ahead of time that you will be unable to take a test on the day that is scheduled, arrangements may be made to take one test early. The test dates are in the Class Schedule in the Getting Started Section of the Modules.

You are allowed one attempt at each test and the final. There are no opportunities to retake the tests.

Your test grades can be viewed in Canvas usually within 72 hours.

Comprehensive Final Exam

The Final Exam is mandatory. It covers Module 4 and includes a comprehensive review of the three other modules. You will be allowed to use your TI-83/-84 calculator. Using any other resource (including cell phones) will be considered a violation of the Academic Integrity policy.

If you know ahead of time that you will be unable to take the final exam at the scheduled time, arrangements may be made to take the exam early.

Your final exam grade can be viewed in Canvas with a turn-around time of 72 hours.

You deserve to be rewarded for showing improvement over the course of the semester. If your final exam score is higher than your lowest test score, I will replace your lowest test score by the final exam score if doing so results in a higher letter grade.

Course Syllabus: MAT 191: Calculus 1

Grade Distribution

Quizzes	10%
Graded HW (WebAssign)	15%
Tests	45%
Cumulative Final Exam	30%

Grading Scale

A	90% to 100%
B	80%-89%
C	70%-79%
D	60%-69%
F	0% -59%

Class Schedule

The Class Schedule can be found in the Getting Started section of the Modules. This contains the expected sections of the text for each class meeting, the due dates of the homework and the dates of the quizzes, tests, and final exam.

Technical Support

For technical assistance, contact the Technical Call Center, 410-777-4357 (410-777-HELP) or email at helpdesk@aacc.edu

For hours of operation, visit the [AACC Technology Services webpage](#)

Important Dates

It goes without saying that each day from August 28 through the end of the course is important. The last day for a W grade is November 20. Other dates related to auditing and refunds can be found in My Class Schedule on MyAACC.

Academic Integrity

In this particular class, academic integrity means that any work you turn in as part of a graded assignment should be your own work and represent your own understanding of the material.

In MAT191, websites and apps such as Mathway and Wolfram Alpha, which complete math problems for you, are not allowed. That means while you are working on note-taking, graded homework, quizzes, and tests, you may only use allowed resources to show your mathematical computations.

Course Syllabus: MAT 191: Calculus 1

All suspected violations of the Academic Integrity Policy will be reported.

Netiquette

Netiquette” refers to a set of guidelines for online communication. Please adhere to the following guidelines for any communication within this class:

- Use appropriate language and tone. This means to always show respect and consideration for everyone in the class. Please remember that it is difficult to convey tone in online communication.

Participation

You are expected to attend each class; to log in to our course in Canvas to learn course material, review and complete assignments, ask questions, and watch videos on section material; and to be working on the graded work in WebAssign.

You are also expected to respond to Canvas Conversations (messages) and emails from your instructor within 24 hours.

Attendance (participation) is reported weekly to the college. In addition to losing out on opportunities to gain understanding, poor attendance/participation can result in problems with financial aid or veterans benefits.

Best Practices for Learning Success

Read, watch, and practice the material: You are expected to learn by reading the textbook, watching videos, and practicing the homework problems. Doing daily homework is an extremely important part of the formula for success in any mathematics course. If you have any questions, please contact me.

Take time for this class and be engaged: You are expected to intentionally set aside specific times to work on your math. You should try to have these work sessions every day if possible. Keep this time as distraction free as you can. Put away any electronic devices other than the one being used to access your coursework. Stay on task during each work session. Your cell phone, Facebook, Snapchat, Sports games, texting, etc. can wait. Your success in this course depends on your level of commitment to learning.

Communication

You are expected to check your Canvas email and course announcements on a regular basis (at least once every two days) to be up-to-date on any announcements or due dates for our course as well as conversation messages sent from the instructor.

Because the pace of this course moves so quickly, I will respond to your emails within 24 hours (M-F) and request that you respond to mine with 24 hours (M-F). Although I will try to check these on the weekend, I cannot guarantee you will receive a response in a timely manner. As a result, do not wait until the last minute to contact me if you have any questions, or a problem that needs solving

Course Syllabus: MAT 191: Calculus 1

Expected Workload

You are investing your time, energy, and money in this course. To get the best return on this investment, you need to carefully budget your math time. On average, successful students spend at least 12 hours a week working on this class.

More important than how MUCH you study is HOW you study. Studying is a skill that takes practice just like learning how to play the piano or shoot a basketball. Dedicate time to reading the textbook, watching videos, taking notes, studying and re-doing problems in your notes, working (and re-working) WebAssign problems, doing exam reviews, and preparing for exams.

If you are putting in the time but are not seeing the results you want, feel free to ask me for tips to boost study efficiency.

More information about study skills including time management techniques can be found at:
<http://ola2.aacc.edu/vc/timemanagement/TimeManagementWebShop/>

Remember your future is worth every minute!

*I reserve the right to make changes to the class policies contained in this syllabus at any time.
All changes will be announced and posted in Canvas*

Getting Help

Please do not hesitate to seek help promptly when you need it! Each piece of new material builds on what has been presented before. Here are some of the resources that are available to you:

My office hours, listed on the first page of the syllabus, are available to everyone, no appointment necessary. If you aren't available during any of my tutoring hours, send me an email suggesting a time that we can meet. Please be able to share your screen or your work when you come to virtual tutoring hours.

You are both welcome and encouraged to form a study group with your peers in this section of 191 or in any other section.

There are in-person tutoring labs on the Arnold campus (LIB 102) and at AMIL staffed by AACC faculty and peer tutors. See the Getting Help section of the Getting Started module for details.

There is also help available via the Virtual Math Tutoring Center (VMTC). In order to access the virtual tutoring lab, you must first enroll in the VMTC (in the Getting Started Module). Once you are enrolled, you will be able to use the link on the home page to access the tutoring schedule and links to each tutor. See the Getting Help section of the Getting Started module for details.

You also have access to free one-on-one tutoring with another student who has successfully passed 191 in a previous semester. Tutoring is FREE to all AACC students currently enrolled in the course for which they are requesting a tutor. Students are eligible to receive up to 10 hours of one-on-one or small group tutoring per course. <https://www.aacc.edu/resources/academic-services/tutoring/>

Course Syllabus: MAT 191: Calculus 1

Getting Help Beyond This Course

Any student who faces challenges securing their food, transportation, housing or course materials and believes this may affect their performance in this course, is urged to contact the Office of the Dean of Student Engagement for assistance. Please email studenthelp@acc.edu or call 410-777-2511.

Student Opinion Form

Toward the end of the semester, you will be asked to fill out an online Student Opinion Form (SOF) to provide feedback on your learning in this course. Your responses will be anonymous and I will receive the responses only after I have submitted final grades. Your responses are important to me and the administration because they may offer information, recommendations and ideas to improve teaching and learning at the college.

Emergency College Closure

If an emergency arises that causes the college to be closed, the planned activity or assignment for that day will occur or be due the next day that classes resume on campus. Faculty and students are required to meet deadlines that occurred prior to the emergency but are not required to meet previously established deadlines during the time the College is closed. Students are strongly encouraged to continue with coursework during a closure to the degree possible, as assignment timelines may be compressed upon the reopening of the college.

For closure information, students can check www.aacc.edu, and can sign up for text message alerts using the [Stay Informed with Campus Alerts web page](#). If class is cancelled because of an emergency college closure, please check your course in Canvas for possible announcements.

Note that AACC does not follow the delays and closings of Anne Arundel Public Schools.

Academic Integrity Policy

Anne Arundel Community College, with a central mission of producing learning and a belief that individuals be given the opportunity to fully develop their potential, is committed to upholding rigorous and fair standards of student learning and achievement. Achieving successful student learning is dependent upon a dedication to academic integrity on the part of all members of the college community. Without academic integrity, students gain unfair advantage over others and impede their own development.

In support of this aim, Anne Arundel Community College requires all students to exhibit academic integrity in all their academic work. A culture of academic integrity, a unifying principle at AACC and all academic communities, is built upon respect for others' work, commitment to doing one's own work, and intolerance for academic dishonesty in all its forms. Students are responsible for reviewing and complying with the College's Academic Integrity Policy. A student found in violation of this policy shall be subject to appropriate sanctions, up to and including expulsion from the College, in accordance with the Resolving Allegations of Academic Misconduct Procedure and the Academic Misconduct Hearing Procedure. For more information, visit the [Academic Integrity Policy](#) and [AACC Policies webpage for the Academic Integrity Procedures](#).

Course Syllabus: MAT 191: Calculus 1

Student Conduct Policy

Students shall always conduct themselves in a manner that demonstrates mutual respect and courtesy, displays appropriate standards of behavior, and refrains from any actions or in actions that impinge on the rights of others or disrupt the teaching and/or learning process or the operations of the college. A student found in violation of this policy or any other College policy shall be subject to appropriate sanctions, up to and including expulsion from the College, in accordance with the student conduct procedures. The full text of the policy is available on the college's [AACC Policies webpage](#) and in the Student Handbook and College catalog. Additional information for [Code of Conduct webpage](#).

Acceptable Use of Information Technology Resources Policy

This policy governs the acceptable use of the college information resources by anyone. This policy applies to students enrolled in this course at any time they are using college resources. The goal of the usage policy is to encourage an environment of learning in which all students can interact in an open, legal, and ethical manner. The full text of the policy is available on the AACC [Acceptable Use of Technology Resources Policy webpage](#) <https://www.aacc.edu/policies/acceptable-use-of-information-technology-resources/> procedures that implement the policy are available on the AACC [Acceptable Use of Information Technology Resources Procedures](#).

Notice of Nondiscrimination updated June 1, 2023

The college prohibits all types of discrimination including, but not limited to, race – including hair texture and hairstyle – color, religion or creed, ancestry or national origin, sex, age, marital status, physical or mental disability, sexual orientation, gender identity, veteran status, citizenship, and genetic information. Complaints of discrimination shall be reported to the college's chief compliance and fair practices officer. For information regarding the college's compliance and complaints concerning discrimination, contact the chief compliance and fair practices officer and Title IX coordinator at complianceofficer@aacc.edu or 410-777-1239, or call Maryland Relay at 711.

Americans with Disabilities Act Policy

Anne Arundel Community College prohibits all types of discrimination, harassment, sexual misconduct, and retaliation on the basis of race, including hair style and hair texture, color, religion or creed, ancestry or national origin, sex, age, marital status, physical or mental disability, sexual orientation,

Course Syllabus: MAT 191: Calculus 1

gender identity, veteran status, citizenship, and genetic information. To file a complaint of discrimination, harassment, sexual misconduct, or retaliation, please contact the chief compliance and fair practices officer/Title IX coordinator at 410-777-1239 or complianceofficer@aacc.edu. Students who need a reasonable accommodation should contact [Disability Support Services](mailto:DSS@aacc.edu) at DSS@aacc.edu or 410-777-1411. Requests for most accommodations must be made at least seventy-two (72) hours prior to the event or activity; however, requests for sign language interpreters, live captioning, alternate format books, or assistive technology need to be submitted at least thirty (30) days prior to the event or activity.

Religious Accommodations Policy

Anne Arundel Community College prohibits discrimination, harassment, and retaliation on the basis of religion. The purpose of this Religious Accommodations Policy is to describe the rights of Employees and Students to request and receive Religious Accommodations in accordance with the College's policies and relevant laws and regulations regarding Religious Beliefs. For more information, review the [Religious Accommodations Policy webpage](#). Also, review the [Student Religious Accommodations Procedure webpage](#).

COVID-19 Policy

The College encourages all employees and students to become fully vaccinated against COVID-19 to protect themselves and the College's employees, students, and the greater community as well as to obtain boosters or additional primary doses once eligible. Anne Arundel Community College COVID-19 Policy establishes that Clinical Participants (as defined in the policy) must be fully vaccinated against COVID-19 and provide proof of vaccination to the College, unless granted an accommodation by the College (and if applicable, the Clinical Site) in accordance with the COVID-19 Vaccination for Clinical Participants Procedure. This Policy establishes that the College may issue a mandate to all employees, students, and visitors to wear face coverings as set forth in the Face Coverings Procedure, unless granted an accommodation. For more information, review the [COVID-19 Policy webpage](#) and the [COVID-19 Vaccination for Clinical Participants Procedure webpage](#).

Emergencies

Public Safety is available to assist with first aid, escorts to cars, jumpstarts, lockouts, and emergencies. If you need to contact public safety for any of these reasons, the number is: 410-777-1818.

Best wishes for a great semester!
